

Social Security Administration Representative Payee Program

The newest program, **Representative Payee Money Management Program** benefits seniors who cannot go to the bank to cash/withdraw monies from their accounts, as well as, those who do not have capacity to handle their finances.

Under this program, One Stop's becomes the Social Security Representative Payee for the client, to receive the client's Social Security checks, establish a bank account and use those funds to pay the client's bills and allocate an allowance for the purchase of groceries and miscellaneous items.

This project began as a pilot over a year ago, beginning with two clients. There are now six clients enrolled in this program with another six will be ready to be enrolled over the next year. It is a program that offers a much-needed service and allows those seniors in the program to remain in their own homes without becoming financially vulnerable.
